**Academic group:** FOENS  
**Academic org:** FOES03  
**Student contribution band:** 2  
**ASCED code:** 010711

**STAFFING**
Examiner: Ken Moore  
Moderator: Mark Porter

**REQUISITES**
Pre-requisite: ENV3104 and ENV3105

**SYNOPSIS**
This course is designed as the upper level course for students electing to major in water engineering. It provides an insight into the management of water resources and the environment, the magnitude and utilisation of the resource, the management tools available and the controlling legislation. The course also provides an opportunity for students to be practiced in the use of complex computer simulation programmes available to practicing engineers, including free surface flow, stochastic hydrology, catchment and groundwater modelling. The course allows the integration of the material presented in the earlier courses under the segregated headings of hydraulics and hydrology. It relies heavily on the use of case studies, workshops and directed study assignments to enhance the programme of lectures.

**OBJECTIVES**
The course objectives define the student learning outcomes for a course. The assessment item(s) that may be used to assess student achievement of an objective are shown in parenthesis. On completion of this course, students should be able to:

1. discuss how water resources projects address a range of often conflicting technical, economic, social and legal objectives and explain the role of public consultation in engineering works; (3 Hour Closed Examination)
2. contrast the different perceptions of water resources systems held by different groups in society; (3 Hour Closed Examination)
3. explain the important features of Australian and related legislation; (3 Hour Closed Examination)
4. assess the measure of the available water resource (nationally and locally) and evaluate the prospects of its development at different geographic locations; (3 Hour Closed Examination)
5. compare and assess the usefulness of a range of techniques available for flood mitigation, river and flood plain management; (3 Hour Closed Examination)
6. solve via the medium of case studies, problems in water resource management; (3 Hour Closed Examination)
7. describe the theoretical basis of the particular computer methods studied; (Assignment 1; Assignment 2; Assignment 3; 3 Hour Closed Examination)
8. apply the computer models studies to real situations and evaluate the effectiveness of simulation in design; and (Assignment 1; Assignment 2; Assignment 3; 3 Hour Closed Examination)
9. calibrate a model to measured data and assess the quality of the model fit (Assignment 1; Assignment 2; Assignment 3; 3 Hour Closed Examination)

TEXT and MATERIALS required to be PURCHASED or ACCESSED

ALL textbooks and materials are available for purchase from USQ BOOKSHOP (unless otherwise stated). Orders may be placed via secure internet, free fax 1800642453, phone 07 46312742 (within Australia), or mail. Overseas students should fax +61 7 46311743, or phone +61 7 46312742. For costs, further details, and internet ordering, use the 'Textbook Search' facility at http://bookshop.usq.edu.au click 'Semester', then enter your 'Course Code' (no spaces).
REFERENCE MATERIALS

Reference materials are materials that, if accessed by students, may improve their knowledge and understanding of the material in the course and enrich their learning experience.

NOTES

1. Student Administration will advise students of the dates of their examinations during the semester.
IMPORTANT ASSESSMENT INFORMATION

1 Attendance requirements:
   There are no attendance requirements for this course. However, it is the students’
   responsibility to study all material provided to them or required to be accessed by them
   to maximise their chance of meeting the objectives of the course and to be informed of
   course-related activities and administration.

2 Requirements for students to complete each assessment item satisfactorily:
   To satisfactorily complete an individual assessment item a student must achieve at least
   50% of the marks or a grade of at least C-. (Depending upon the requirements in
   Statement 4 below, students may not have to satisfactorily complete each assessment
   item to receive a passing grade in this course.)

3 Penalties for late submission of required work:
   If students submit assignments after the due date without prior approval then a penalty
   of 20% of the total marks available for the assignment will apply for each working day
   late.

4 Requirements for student to be awarded a passing grade in the course:
   To be assured of receiving a passing grade a student must achieve at least 40% in each
   of the weighted assessment items and at least 50% of the total weighted marks available
   for the course.

5 Method used to combine assessment results to attain final grade:
   The final grades for students will be assigned on the basis of the weighted aggregate
   of the marks (or grades) obtained for each of the summative assessment items in the
   course.

6 Examination information:
   In a Closed Examination, candidates are allowed to bring only writing and drawing
   instruments into the examination.

7 Examination period when Deferred/Supplementary examinations will be held:
   Any Deferred or Supplementary examinations for this course will be held during the
   examination period at the end of the semester of the next offering of this course.

8 University Regulations:
   Students should read USQ Regulations 5.1 Definitions, 5.6. Assessment, and 5.10
   Academic Misconduct for further information and to avoid actions which might
   contravene University Regulations. These regulations can be found at the URL
   http://www.usq.edu.au/corporateservices/calendar/part5.htm or in the current USQ
   Handbook.

ASSESSMENT NOTES

1 The due date for an assignment is the date by which a student must despatch the
   assignment to the USQ. The onus is on the student to provide proof of the despatch
   date, if requested by the Examiner.

2 Students must retain a copy of each item submitted for assessment. This must be
   despatched to USQ within 24 hours if required by the Examiner.

3 In accordance with University's Assignment Extension Policy (Regulation 5.6.1), the
   examiner of a course may grant an extension of the due date of an assignment in
   extenuating circumstances.

4 The Faculty will normally only accept assessments that have been written, typed or
   printed on paper-based media.
5 The Faculty will NOT accept submission of assignments by facsimile.

6 Students who do not have regular access to postal services or who are otherwise disadvantaged by these regulations may be given special consideration. They should contact the examiner of the course to negotiate such special arrangements.

7 In the event that a due date for an assignment falls on a local public holiday in their area, such as a Show holiday, the due date for the assignment will be the next day. Students are to note on the assignment cover the date of the public holiday for the Examiner's convenience.

8 Students who have undertaken all of the required assessments in a course but who have failed to meet some of the specified objectives of a course within the normally prescribed time may be awarded one of the temporary grades: IM (Incomplete - Make up), IS (Incomplete - Supplementary Examination) or ISM (Incomplete - Supplementary Examination and Make up). A temporary grade will only be awarded when, in the opinion of the examiner, a student will be able to achieve the remaining objectives of the course after a period of non directed personal study.

9 Students who, for medical, family/personal, or employment-related reasons, are unable to complete an assignment or to sit for an examination at the scheduled time may apply to defer an assessment in a course. Such a request must be accompanied by appropriate supporting documentation. One of the following temporary grades may be awarded IDS (Incomplete - Deferred Examination; IDM (Incomplete Deferred Make-up); IDB (Incomplete - Both Deferred Examination and Deferred Make-up).

OTHER REQUIREMENTS

1 Students will require access to e-mail and internet access to USQConnect for this course.
